

Pioneer

ENTER A WORLD OF
FASCINATION.

HOME ENTERTAINMENT GUIDE

The thrill of the original.

Each sound, each image, each performance is an original. At Pioneer, we are driven by a deep dedication to that unique experience. For more than 70 years we have been creating sound systems that reproduce the thrill of the original – in all its dimensions, in striking clarity, detail and richness. True to this tradition, Pioneer audiovisual systems use cutting-edge technology to match their exhilarating sound with images in breathtaking sharpness and purity.

We are committed to placing all these dimensions of hearing, seeing and feeling right at your fingertips. Our leading expertise in audio excellence shows in each of our products – systems that bring your favourite music and multimedia entertainment to life just as the original artists intended. Internet-based content, radio or TV, sounds and images on Blu-ray discs, DVDs or SACDs, CDs, MP3 players, USB storage devices and even your iPod and iPhone – we bring it all into your home with components that are a joy to operate. And a thrill to use.

YOUR SENSES AT CENTRE STAGE.

Love at first sound.

Pioneer AV receivers are a clear expression of passion for audio excellence.

They are designed and built with just one purpose in mind: to deliver all the power and precision of our highly advanced

Blu-ray, DVD and CD players – and entertainment from a broad spectrum of other sources – to your ears and eyes. All models

except the VSX-420 are HD Audio capable, to bring sound to life in all its dimensions, and come equipped with our specially developed Precision Quartz Lock System (PQLS). They also feature Pioneer's Phase Control technology, which ensures that all sound waves arrive at the listening position in phase. For an accurate speaker set-up the Multi-Channel Acoustic Calibration System (MCACC), a technology that uses the same functionality as a professional sound stage, brings outstanding audio precision into your entertainment environment.

The top-of-the-line Pioneer AV receivers SC-LX83 and SC-LX73 are fitted with Direct Energy HD Amplifiers and have even undergone exacting tuning for accuracy and purity at the highly respected AIR Studios in London.

Picture perfect.

Visual media sources can vary in quality. Our high standards remain the

same. The more advanced Pioneer AV receivers are engineered to upscale images. Building on Pioneer's long experience in

sophisticated video processing, they deliver noise-free images with richer colours and greater detail. For new-generation 3D entertainment, all our AV receivers that feature AV repeater functionality can handle 3D over HDMI via integrated HDMI 1.4a interfaces. That means you can enjoy the thrill of three-dimensional broadcasts, films or gaming applications up to 1080p.

AV RECEIVERS

Have it all.

With today's wide and expanding array of audio and visual content sources, it's hard to choose.

Pioneer's answer: don't choose – enjoy them all. That's why our AV receiver line-up features more input options than ever. Many models let you play content stored on mobile devices like your iPod or iPhone via a special USB cable, which is included as standard in the box. A *Bluetooth*® wireless adapter, included with the top models and available as an option in others, makes audio streaming more convenient. From the VSX-920 upward, all models feature internet radio. The SC-LX83 is even DLNA certified for network functionality.

Easy operation.

Our AV receivers are not only a source of great entertainment – they are also a joy to operate. Their graphical user interface (GUI) is exceptionally clear and intuitive, while control with HDMI functionality lets you operate both the receiver and the connected TV with one remote.

The top models feature Radio Frequency Remote Control (RF Remote) compatibility for even more convenient operation. In contrast to a conventional infrared interface, an RF Remote requires no optical contact with the receiver. That means with a Pioneer RF Remote control unit – included with the SC-LX83 and optional with other AV receivers – you can operate your system from anywhere in the room.

But your options don't end there: iControlAV enables you to control your Pioneer AV receiver from the screen of your iPod touch or iPhone.

SC-LX90

Our most powerful and advanced amplifier yet: the SC-LX90 reproduces high definition sound worth a standing ovation. Incorporating a unique Direct Energy HD Amplifiers, developed together with ICEpower, the amplifier delivers solid drive capability that can realise truly simultaneous multi-channel total power output of 1400 W over 10 channels.

SC-LX83

**Internet
Radio**

Premium 1080p ready multi-channel AV Receiver with vTuner internet radio.

Direct Energy HD Amplifiers, built on ICEpower Class D technology.

Tuned at AIR Studios. 7-ch/190 W. HDMI V.1.4a with 3D, ARC (6 in/2 out).

RS-232C. PQLS Bit-stream. Full Band Phase Control.

Advanced Sound Retriever/Sound Retriever AIR. DLNA 1.5.

iPod/iPhone Digital Connection via USB. iControlAV ready. RF Remote (included).

Bluetooth® ready (AS-BT100 adapter included). THX Ultra2 Plus.

Multi Zone (3 Zone).

Made for

iPod

iPhone

High-def Amplifier.

Developed in collaboration with ICEpower, the Direct Energy HD Amplifier is the only Class D amplifier certified by THX, which produces high simultaneous and equal drive to each channel. The result is truly outstanding multi-channel high power, fidelity and efficiency.

Jitterless sound.

Precision Quartz Lock System (PQLS) effectively minimises jitter, resulting in stereo and multi-channel sound of striking brilliance. New-generation PQLS technology (in the SC-LX83) now supports bit-stream transmissions as well as PCM.

Distortion-free audio.

To ensure that all sound frequencies arrive at the listening position simultaneously, Pioneer has developed Phase Control. It corrects the phases, effectively preventing distortion and colouring. Full Band Phase Control, featured in the SC-LX83, takes the technology even further and also compensates for group delay in the speaker's internal crossover network.

SC-LX73

**Internet
Radio**

Premium 1080p ready multi-channel AV Receiver with preset internet radio.

Direct Energy HD Amplifiers, built on ICEpower Class D technology.

Tuned at AIR Studios. 7-ch/180 W. HDMI V.1.4a with 3D, ARC (6 in/2 out).

RS-232C. PQLS Multi Surround. Phase Control. Advanced Sound Retriever/

Sound Retriever AIR. iPod/iPhone Digital Connection via USB. iControlAV ready.

RF Remote ready. Bluetooth® ready (AS-BT100 adapter included).

THX Select2 Plus. Multi Zone (3 Zone).

Made for

iPod

iPhone

Remote control from anywhere.

Radio Frequency (RF) Remote is a significant improvement over infrared remote controls. With the CU-RF100 you can position your compatible AV receiver anywhere in the room – even in a closed cabinet.

Automatic acoustic tuning.

No two listening environments are alike. Pioneer's Multi-Channel Acoustic Calibration System (MCACC) analyses the room and automatically adjusts the speakers output to balance out any room-induced acoustic inaccuracies.

Enhanced compressed audio.

Advanced Sound Retriever technology enhances compressed sound data to elevate formats like MP3 to breathtaking richness and detail. For **Bluetooth®** streaming, Sound Retriever AIR restores audio pressure and density and suppresses noise caused by the transmission, resulting in high quality audio.

The full iPod and iPhone experience.

The iPod Digital transmission via USB enables you to listen to the music collection stored on your iPod or iPhone in lossless, digitally optimised quality. A separate cable also lets you view still or moving images and enhance your listening experience with original album art and music videos.

VSX-LX53

Control from your iPhone.

With Pioneer's free iControlAV application, available from the App Store, you can control the main functions of your compatible Pioneer receiver with an iPod touch or iPhone. Operation is intuitive and convenient.

Internet radio entertainment.

All AV receivers from the VSX-920 on up support internet radio, a vast and growing source of audio entertainment and information. The top model SC-LXB3 uses vTuner portal for access, while the other models come with 24 preset stations and easy personalisation options.

Bluetooth® wireless connectivity.

The SC-LXB3, SC-LX73 and VSX-LX53 come with the AS-BT100 Bluetooth® adapter, for easy wireless audio streaming from a compatible device. All other models except for the VSX-420 are Bluetooth® ready and can be fitted with the Bluetooth® adapter optionally.

More speaker setup options.

This year's AV receiver line-up opens up more speaker configuration possibilities than ever: Pioneer soundscape technologies allow you to adjust your system to get the most out of your speakers in various setups. Wide Surround provides spacious audio from front speakers and Wide Surround Movie creates a motion sensation in front, while Wide Surround Music offers an expansive sound field.

3D sound, 360° listening.

Dolby Pro Logic IIz surround sound processing expands the 360° listening experience. Ideal for new-generation 3D movies and gaming applications, it creates a sense of height as well as depth.

Perfection in a package.

For home cinema fans looking for an ideal receiver-speaker combination, the special home theatre package HTP-100 is the answer. Get more information on page 23.

VSX-820

Multi-channel AV Receiver with AM/FM Tuner.

5-ch/130 W. HDMI V.1.4a with 3D (4 in/1 out).

Phase Control. Advanced Sound Retriever. iPod/iPhone Digital Connection via USB. *Bluetooth*® ready (requires AS-BT100 adapter).

Dolby Pro Logic IIz. OSD. Auto MCACC. Auto Level Control.

Front Stage Surround Advance. Also available in silver².

VSX-520

Multi-channel AV Receiver with AM/FM Tuner.

5-ch/130 W. HDMI V.1.4a with 3D (3 in/1 out).

Phase Control. Advanced Sound Retriever.

Bluetooth® ready (requires AS-BT100 adapter). Dolby Pro Logic IIz.

Auto MCACC. Auto Level Control. Front Stage Surround Advance.

Also available in silver².

VSX-420

Multi-channel AV Receiver with AM/FM Tuner.

5-ch/130 W. HDMI switching (2 in/1 out). Phase Control.

Advanced Sound Retriever. Multi Zone (2 Zone). Auto Level Control.

Front Stage Surround Advance. Also available in silver².

Ready for new dimensions.

New Pioneer AV receivers are equipped to open the door to the next dimension of audiovisual entertainment for you: with the exception of the VSX-420, all models are 3D capable. Their new-generation HDMI V.1.4a technology supports the 3D-specific command protocol, enabling you to enjoy the breathtaking new visual effects in 3D films, broadcasting and gaming applications on your 3D compliant display or TV.

SET OUT FOR NEW HORIZONS.

The sound of excellence.

True to their Pioneer heritage, our Blu-ray Disc players are built using the most advanced audio technology available. Their HD audio decoders, combined with Precision Quartz Lock System (PQLS), create immersive soundscapes of gripping intensity and accuracy. The third generation of Pioneer's PQLS technology not only virtually eliminates jitter, but now also processes bit-stream audio transmissions. And as they support the formats Dolby TrueHD and dts-HD Master Audio Essential, they deliver the full scope of today's high-definition technology.

Put your network to work.

There is much more to today's total viewing experience than playing movies stored on discs. New-generation Pioneer Blu-ray Disc players can be connected to the internet by cable or wireless with an optional USB wireless LAN dongle – enjoy bonus material and interactive options via BD-Live or use your Pioneer Blu-ray Disc player to view web-based content from YouTube. Via the Intelligent Network Update functionality, you are automatically notified of the latest available firmware, letting you conveniently keep your home entertainment system up to date.

Take control.

A large-format graphical user interface and the exceptionally straightforward control with HDMI functionality let you operate your player directly on the viewing monitor – no need to leave your seat. To ensure that you get the most out of every format, Pioneer DVD players support video scaling technology to enhance DVD movies.

BLU-RAY DISC PLAYERS DVD PLAYERS

Built for stability.

The BDP-LX53 is built according to the Armoured Chassis Concept, which uses a special layered construction along with stabilisers, insulators and shock absorbers to achieve maximum inertia and prevent vibrations.

Jitterless audio.

The Pioneer technology Precision Quartz Lock System (PQLS) virtually eliminates jitter in stereo or multi-channel sound transmissions for exceptionally precise audio. New-generation PQLS also supports bit-stream transmissions in addition to PCM.

Use your iPhone as a remote.

Download the free iControlAV application from the App Store and use your iPod touch or iPhone to access the main functions of your Pioneer Blu-ray Disc player. Intuitive graphics appearing on the iPod touch or iPhone's touchscreen allow easy adjustments and operation of your player.

BDP-LX53

¹ With optional AS-WL100 adapter.

Plug in and record your music.

An interoperable recording functionality allows CD-to-USB ripping. Chosen CD tracks can be converted to MP3 format in the selected quality and recorded to a USB storage device. Ripping speeds of up to 2.5x are possible.

Restored compressed sound.

To compensate for the loss of audio data through storage in compressed formats like MP3, Advanced Sound Retriever technology intelligently restores sound files to a level of depth and brilliance that comes as close as possible to the original.

Support of digital sound formats.

Dolby Digital and DTS deliver thrilling, cinema-quality sound that makes home viewing more intense than ever.

Upscaled image quality.

Pioneer DVD players with HDMI support 1080p scaling, a technology that converts and enhances various DVD formats and delivers them in stunning HDMI output.

Open-minded.

The expanding scope of audiovisual entertainment formats offers a world of possibilities – and Pioneer wants to open up that world to you. Our DVD players are designed for many more media than discs. They support a wide range of audio, still and moving image formats, including DivX, Windows Media Audio, MP3 and JPEG.

MONUMENTAL PERFORMANCE.

In tune with your senses.

Perfect home cinema is all about harmony. Like the instruments of an

orchestra, each component of the system must be precisely attuned to all the others. As a leader in audio technology,

Pioneer uses its expertise in achieving balance and synchronicity to create perfectly coordinated systems. Your benefit: grippingly real, immersive cinema experiences. All Pioneer Blu-ray home cinema systems are equipped to show your Blu-ray films at their original cadence of 24 frames per second – for original cinema screenings just as the director intended. With integrated 1080p Video Converters, our home cinema systems can even upscale DVD movies to breathtaking brilliance.

Open to your interests.

But Blu-ray discs and DVDs are just the beginning of today's content

sources. Our audiovisual entertainment systems are open to a full range of options, like CD and MP3 playback, DivX films.

The Blu-ray solutions even offer network-streaming via DLNA-certified connectivity. And with easy iPod and iPhone integration as well as *Bluetooth*® wireless audio streaming, your Pioneer Blu-ray home cinema system is your source of 360° entertainment.

HOME CINEMA SYSTEMS

Web-based extras.

To give you the full Blu-ray entertainment experience, the interactive option BD-Live allows direct access to web-based bonus material, additional subtitles and even online gaming and chat sessions with other movie fans (actual features depend on the disc).

Certified network capacity.

Pioneer Blu-ray home cinema systems are certified for network capability by the Digital Living Network Alliance (DLNA), ensuring easy access to content on a compliant network-integrated PC or server.

BCS-707

5.1-channel Blu-ray Disc Home Cinema System.

Peak Power Total 1100 W. 1080/24p.

INSTRUMENTS OF EXCELLENCE.

Sound proof.

Uncompromising engineering, design and craftsmanship – the Pioneer G-Clef Series lives up to the standards you demand for the music you love. Because G-Clef amplifiers and Super Audio CD players are built to meet the exacting professional standards of the internationally respected AIR Studios in London, you can count on them to perform in perfect harmony. The quality seal of the legendary centre of audio expertise is proof not only of extraordinary engineering, but also of exceptional craftsmanship and carefully selected electronic components.

Stereo excellence.

There is no substitute for brilliant stereo of exquisite sound quality and accuracy. The sought-after open sound and ultra-quick responsiveness that bring every detail of recorded music to life can only be achieved in components developed with stereo excellence in mind. Our G-Clef Series meet these demands, with extremely short signal paths as well as substantial power and stability in all components. But along with audio excellence, Pioneer components also offer versatility: the PDX-Z9 Super Audio CD receiver features full network capability, while the compact X-HM50 2-channel CD receiver system is equipped with a Digital Direct Connection for your iPod or iPhone, a USB interface and integrated FM tuner.

AUDIO COMPONENTS

Perfect symmetry.

The amplifiers' Twin Mono Symmetrical Construction prevents signal interference by separating the left and right channels, which results in pure sound with an extensive sound field. The Direct Construction allows the shortest and simplest design paths – from input to output, circuit block by circuit block.

Precise nuances.

Pioneer's Legato Link Pro Conversion system uses psychoacoustic signal processing to restore missing subtle dynamics and recreate the shading and detail of the original performance.

Purist styling.

G-Clef Series components are not only engineered for pure excellence in stereo sound, they are also designed and crafted for aesthetic purity. Their sleek and elegant cabinets feature a silk-soft hairline finish black aluminium front panel and blue LCD display.

A-A9MK2

Integrated Amplifier. 70 W + 70 W (20 – 20,000 Hz, 4 Ω).
 Aluminium front and side panels. Metal feet.
 Quick Response Power Supply Circuit. Dual Mono Symmetrical Construction.
 Rigid Underbase Construction. Twin Toroidal Transformer. Phono EQ MM/MC.
 Audio Input: CD/Phono/Tape/AUX/Tuner/USB (for PC).

PD-D9MK2

Super Audio CD Player. Sampling Rate Converter.
 Aluminium front, top and side panels. Quick Response Power Supply Circuit.
 Wolfson Twin D/A Converters (192 kHz/24-bit).
 High Accuracy System & Audio Master Clock.
 Legato Link Conversion Pro & Hi-bit.
 Rigid Underbase Construction & Stainless steel CD mechanism.
 TAOC feet. Pure Audio Mode. Media: CD/SACD/CD-R/CD-RW/MP3/WMA.

F-F6MK2

DAB/FM/AM Tuner. Aluminium front panel.
 High-Performance D/A Converters (192 kHz/24-bit).
 200 Stations (100 DAB, 100 FM/AM).
 Group presets. RDS with radio text.

A-A6MK2

Integrated Amplifier. 60 W + 60 W (20 – 20,000 Hz, 4 Ω).
Aluminium front panel. Quick Response Power Supply Circuit.
Dual Mono Symmetrical Construction.
Phono EQ MM. Audio Input: CD/Phono/Tape/AUX/Tuner.

PD-D6MK2

Super Audio CD Player.
Aluminium front panel. Quick Response Power Supply Circuit.
Burr-Brown Twin D/A Converters (192 kHz/24-bit).
High Accuracy System Master Clock.
Legato Link Conversion Pro & Hi-bit. Pure Audio Mode.
Media: CD/SACD/CD-R/CD-RW/MP3/WMA.

F-F3MK2¹

FM/AM Tuner. Aluminium front panel.
100 Stations, Group presets.
RDS with radio text.

Detailed audio.

Whatever your favourite music genre, you want to hear every detail. G-Clef amplifiers and Super Audio CD players are equipped with non-feedback power supply circuits and low Equivalent Series Resistance (ESR) capacitors with Schottky barrier diodes for exceptionally clean and detailed sound.

Take control.

The redesigned remote control units that come with each G-Clef amplifier, Super Audio CD player and tuner feature high-quality aluminium housings and cross-device functionality. That means you can access basic controls of the player and tuner from the amplifier's remote, and control the power and volume of the amplifier from the player's and tuner's remote.

¹ Not available in the UK.

Multisource receiver.

The DLNA certified PDX-Z9 Super Audio CD receiver brings it all together: Super Audio CD and CD playback, terrestrial AM/FM and internet radio reception as well as access to entertainment in a wide range of formats. You can even enjoy content stored on your computer, iPod or USB device.

PDX-Z9¹

Internet
Radio

Super Audio CD Receiver.

50 W + 50 W (4 Ω). Aluminium top panel.

Full dot white OEL display. Touch sensor buttons.

FM/AM Tuner. Internet radio. DLNA certified.

USB terminal. iPod terminal. Advanced Sound Retriever.

Plays:

- from disc: CD/SACD/CD-R/CD-RW/MP3/WMA
- from USB/via Network: MP3/MPEG-4 AAC/WMA/FLAC/WAV

Big sound, small format.

The small size stereo CD receiver X-HM50 delivers outstanding performance and versatility. It is not only equipped with a Digital Direct Connection for your iPod or iPhone, but also features a USB interface and integrated FM tuner. With 50 Watts of output per channel, it is the ideal solution for music lovers looking for a lot of power and brilliant sound in a small package.

X-HM50

CD Receiver System.

50 W + 50 W (4 Ω).

iPod Digital Direct Connection, iPod Video out, charging and control with remote control. Aluminium front panel & Aluminium volume knob.

Continental Model: AM + FM (with RDS) Tuner (available in silver and black).

UK Model: DAB + FM (with RDS) Tuner (available only in black).

Plays:

- from disc: CD/CD-R/CD-RW/MP3/WMA
- from USB: MP3/WMA

¹ Not available in the UK.

SOLID FROM THE GROUND UP.

Sound without borders.

As the final link in the sound-reproduction process, the speaker deserves very special attention. To make sure the full sonic power and precision of your Pioneer system reaches your ears, your equipment must be paired with perfectly matched speakers. From classic stereo to multi-channel surround sound, Pioneer offers a range of speaker systems as varied and rich as the music and cinema experiences they are designed to create.

Our passion for audio excellence is nowhere more clear than in our EX Series of Reference Speakers. Engineered according to the highest standards of audio technology and constructed using the most advanced materials and internal components available, EX Series speakers produce audio experiences strikingly close to live sound.

Proven performance.

These highly responsive and powerful instruments are tuned and certified by

the internationally acclaimed temple of sound, AIR Studios in London. The EX Series speakers owe their superlative performance and accuracy in part to Coherent Source Transducer (CST) technology – an exclusive TAD (Technical Audio Devices) solution that places the

tweeters concentrically within the cones of the midrange units for extraordinary coherency that is free of colouration. In addition, the drivers in all ranges are constructed using highly advanced materials, resulting in exceptional accuracy from deep basses to scintillating high notes.

SPEAKERS

Solid construction.

Pioneer's unique speaker architecture and construction result in drivers of unsurpassed coherence and accuracy. With cabinet wall thicknesses of up to 100 millimetres, our EX Series speakers deliver totally stable, vibration-free sound.

Advanced materials.

EX Series tweeter drivers are equipped with Beryllium or Ceramic Graphite diaphragms for extreme accuracy up to 100 kHz. Magnesium cones in the midrange units and Aramid/Carbon cones in the woofers result in creating fast and dynamic tones.

Professional standards.

The EX Series was developed in cooperation with TAD (Technical Audio Devices), a Pioneer brand specialising in professional speakers, established in 1975. TAD monitor speakers are used in many famous recording studios and concert halls around the world.

S-1EX

Reference Floor-standing Speaker.

3-way. 200 W. Concentric arrangement of tweeter and midrange drivers. Beryllium tweeter dome.

Magnesium midrange cone.

High-linearity woofers with neodymium magnets.

Faithful multi-channel audio.

Phase Control minimises sound delays, usually due to the filtering process of multi-channel recordings, by managing the time and phase response of the speakers. In combination with our AV receivers, Pioneer speakers supporting Phase Control – EX, series 8, 7, 3 and all powered subwoofers – reproduce multi-channel audio which is strikingly faithful to the original.

S-2EX

Reference Bookshelf Speaker.

3-way. 200 W. Concentric arrangement of tweeter and midrange drivers. Beryllium tweeter dome.

Magnesium midrange cone.

High-linearity woofer with neodymium magnet.

S-7EX

Reference Centre Speaker.

3-way. 200 W. Concentric arrangement of tweeter and midrange drivers. Beryllium tweeter dome.

Magnesium midrange cone.

High-linearity woofers with neodymium magnets.

Sophisticated audio engineering.

The distinctive shape of EX Series Precision Curve speakers aligns the drivers along a 3-metre radius and ensures that all sounds reach the listener's ears at precisely the same time.

PERSONALISE YOUR OPTIONS.

The beat of life.

Different genres, different styles, different cultures – music is as varied as the people who create it and enjoy it. Yet all forms of music share the same DNA: rhythm is the foundation of every musical expression. And the beat of the heart is the primal source of rhythm. KODO, the Japanese word for heartbeat, is the name of the Pioneer line of speaker systems for iPod and iPhone. Designed in synch with the beat of life, the compact KODO systems offer the audio excellence of Pioneer coupled with seamless, trouble-free iPod and iPhone integration.

Fit for performance.

Each of the systems is equipped with an iPod/iPhone docking station – dual docking stations in the case of the XW-NAC3 and XW-NAC1. Powerful digital amplifiers guarantee full and rich sound, while Advanced Sound Retriever technology enhances your digital music collection. Depending on the model and optional equipment, you can also access your device via Bluetooth music streaming or even listen to internet radio. The XW-NAV1 AV system also offers CD playback and DVD viewing on your compatible TV. It all adds up to a world of entertainment options – and enables you to get more than ever out of your iPod and iPhone.

KODO

DIGITAL SPEAKER SYSTEMS
FOR IPOD

What colour is your music?

No stage could be better for your iPod and iPhone to show what they can do: the XW-NAS5 and XW-NAS3 are powerful speaker systems that bring your digital music to life in a fascinating design. With the overwhelming basses of the downfiring subwoofer and precise, distortion-free high notes, your music unfolds in all colours of the sound spectrum.

iPhone compatibility.

All new Pioneer iPod speaker systems are designed for perfect integration of your iPhone as well as your iPod. Functionalities depend on the model you choose.

Pure digital sound.

The iPod Digital Direct Connection on the XW-NAS5 and XW-NAS3 picks up your audio files and transfers them to the system precisely as they are stored on your device – no intermediate digital-to-analogue conversion steps. The result: purest possible digital sound quality

XW-NAS5

Digital Speaker System for iPod with FM radio and alarm clock.

Made for iPod and iPhone¹. 6 preloaded Soundscapes.

Bluetooth® ready (requires AS-BT100 adapter). Advanced Sound Retriever.

Auto Level Control. LED clock with snooze, wake-up and sleep function.

2-way speakers. 10 cm down-firing subwoofer.

Component and composite Video out.

Available in 4 colours: black, white, silver and red.

XW-NAS3²

The XW-NAS3, available in white, is a pure iPod and iPhone specialist. Like the top-of-the-line XW-NAS5, it offers clear, rich and nuanced sound in a compact format and contemporary design.

¹ Only recent production models are certified. Please look for the logo on the packaging.

² Not available in the UK.

Outstanding sound never looked better.

iPod/iPhone integration and Pioneer audio excellence in a compact, up-to-date package: each of our distinctively designed solutions features intelligent functionalities and advanced technology for pure, clear and powerful sound.

The colourful world of music.

The beautifully styled XW-NAS5 is available in a choice of four metallic-finish colours, while its purist counterpart the XW-NAS3 comes in white only. Whichever model you choose, it will set the tone in any room of your house.

Powerful, dynamic bass.

The 10 cm down-firing subwoofer efficiently spreads the bass and delivers an immersive audio experience.

Enhanced compressed audio.

To restore compressed sound files like MP3 as closely as possible to their original quality, the NAS and NAC models feature Advanced Sound Retriever technology. That means you can enjoy your mobile music collection in enhanced, room-filling audio quality.

Stream with Bluetooth®.

The NAS systems are ready for audio streaming via Bluetooth® wireless technology – the optional adapter AS-BT100 is all you need.

Internet options.

The XW-NAC3 is DLNA certified for network compatibility. Connect it via its LAN interface to a home network with internet access and enjoy internet radio and music files stored on your compliant PC or server.

Wireless connectivity.

Integrated wireless **Bluetooth®** interfaces in the XW-NAC1 and XW-NAC3 allow you to streaming audio files conveniently from A2DP **Bluetooth®** enabled devices. Sound Retriever AIR technology, specially developed to improve the quality of files compressed for **Bluetooth®** transmission, restores sound pressure and density, while reducing transmission noise.

Enhanced video.

The XW-NAV1 audiovisual system features an HDMI port and 1080p upscaling technology to show DVD movies in greater levels of detail on a compatible TV. A composite video output on the rear side of the system allows viewing of videos stored on – or streamed through – your iPod.

Multiple formats via USB.

The XW-NAV1 is equipped with a USB port for easy playback of WMA/MP3 music files, JPEG photos and DivX videos from a USB memory device. CD-to-USB ripping allows easy ripping of CD tracks directly to a USB storage device – no intermediate PC necessary.

Double docking, double entertainment.

Equipped with two docking stations for two iPods or iPhones, the XW-NAC3 and XW-NAC1 offer an array of playback options. The “SHUFFLE2” function intelligently mixes content from both devices for continuous playback with smooth transitions. In Hi-Lite Scan mode, the systems play twenty seconds from each track, for a quick overview of the collections.

XW-NAC3

Dual Digital Speaker System for iPod.

Made for iPod and iPhone. USB. DLNA 1.5.

Internet radio (vTuner). Integrated **Bluetooth®** wireless interface.

“SHUFFLE2” function. Hi-Lite Scan. Auto Level Control. LCD Display.

Sound Retriever AIR. Composite Video out. Full Range speakers.

Available in black, white and red.

XW-NAC1

With an integrated **Bluetooth®** wireless interface, shuffle function, Hi-Lite Scan and Sound Retriever AIR, the XW-NAC1 Dual Speaker System for iPod delivers the same full stereo listening pleasure as its network-capable counterpart, the XW-NAC3.

XW-NAV1

Slim Speaker System for iPod.

Made for iPod and iPhone.

2-way speaker with neodymium tweeter/magnet.

Touch sensitive control.

2-way setting (Wall mount, Desk top).

Component Video Out.

All you want rolled into one.

If you don't want to miss a thing, the XW-NAV1 AV system is the perfect choice. It not only looks great and harmonises with every style, it also opens up a world of entertainment options: on the one hand it's a DVD player, on the other hand it's a multimedia machine that fulfils virtually every wish – from iPod and iPhone compatibility to FM radio and USB connectivity.

XW-NAV1

AV System for iPod.

CD/DVD. FM Tuner. CD → USB ripping (MP3).

USB/CD/DVD (WMA/MP3/JPEG/DivX) digital file playback.

1080p HDMI for DVD. Made for iPod and iPhone. LED Display.

Composite Video out. Bass Reflex with passive radiator.

Available in black and white.
